***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-4, 11, and 12, drawn to a process and apparatus for the isolation of particles produced by a process working at high pressure, wherein the particles are isolated as a suspension in a non-supercritical fluid AND particles isolated from a high pressure process as a suspension in a non-supercritical fluid.

Group II, claim(s) 5 and 6, drawn to a process and apparatus for the homogenization of a particle product, wherein the particles are in a suspension.

Group III, claim(s) 7-10, drawn to a process for the isolation of a product consisting of more than one component produced by separate high pressure processes.

2. The inventions listed as Groups I, II, and III do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The common concept linking together Group I and Group II is the suspension containing the product as produced in a high pressure process. This concept is disclosed in U.S. Patent No. 5,543,057. The common concept linking together Group I and Group III is the product as produced in a high pressure process. This concept is also disclosed in U.S. Patent No. 5,543,057.

Thus, neither the combination of the essential features nor the inherent problem to be solved in the group of inventions are so linked as to form a single general inventive concept. Particularly, there is no technical connection between the solutions of the different technical problems addressed in the three groups of invention which could give the expression to common inventive features.

3. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the

requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

### ***Conclusion***

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to ELIZABETH L. MCKANE whose telephone number is (571)272-1275. The examiner can normally be reached on Mon-Fri; 5:30 a.m. - 2:00 p.m..
